

Connecting You to Your World

The Pocketalker makes listening and communicating with others easy and enjoyable.

For over 30 years people have been using the Pocketalker to enhance their lives by improving their hearing in every day situations. Whether you desire to hear the soft voice of a grandchild, the words of a friend or family member, or the quiet sounds of nature, the Pocketalker can help. The Pocketalker helps keep you connected to the people and activities most important to you.

If you are looking for an “out-of-the-box” hearing assistance solution that offers a quality product at an affordable price, then the Pocketalker is for you.

Improve your **hearing** wherever you are

Doctor Consultations

Conversation in Restaurants

Listening in a Car

How will the Pocketalker Help Me?

The Pocketalker allows you to amplify the sounds and voices most important to you. By placing the microphone close to the desired sounds, you can reduce distracting background noises. The Pocketalker helps you hear what you want to hear while giving you the confidence to actively participate in your everyday conversations and activities.

What is the difference between a hearing aid and a Pocketaalker?

A hearing aid is a “customized” medical approach to hearing loss in which all sounds are amplified. The Pocketaalker personal amplifier is an assistive device for use in situations where you have a hard time hearing and want to amplify specific sounds or voices. Some people find hearing aids helpful, others prefer the Pocketaalker, and many people benefit from using both.

Just like a cell phone, you can use the Pocketaalker as desired throughout your day. Its lightweight small size makes it easy to use anywhere:

- Restaurants
- Doctor/Employer consultations
- Cars
- Small groups
- Church

How do I use the Pocketaalker?

- 1 Plug your earphone or headphone into the headphone jack for personal listening.
- 2 Position the external microphone near the preferred sound.
- 3 Adjust the volume control to the desired level.
- 4 Enjoy your listening experience!
